orqestra

Introducing Orqestra

Ready Student captures every moment in the learner journey. Orqestra transforms that data into institutional intelligence.

Leadership teams need more than transactional visibility. Orqestra connects student management, compliance, and learning outcome data across your institution - giving you the intelligence to make confident decisions about resource allocation, program performance, and strategic growth.

For institutions managing complex multi-campus operations, diverse learner cohorts, and a converging tertiary system, Orqestra delivers the institutional visibility you need to track not just enrolments and completions, but the connection between program design, learner progression, apprenticeship outcomes, and industry engagement success.

UNIFIED INSTITUTIONAL INTELLIGENCE

- Real-time dashboards showing learner progression, completion rates, and outcomes across all cohorts (full-time programs, apprenticeships, RPL, part-time delivery, and higher education pathways)
- Compliance reporting connected to strategic performance metrics - AVETMISS, ASQA audit readiness, and internal performance KPIs integrated together (not siloed from business operations)
- Multi-campus visibility - track performance consistency across locations, identify best practices, scale successful program designs across your institution
- Apprenticeship and credit pathway intelligence - track apprenticeship completion and employment outcomes, understand how learners move between education pathways, identify bottlenecks in dual-sector delivery

ANALYTICS FOR TAFEs

- Identify at-risk learners early across apprenticeships, full-time cohorts, RPL candidates, and part-time delivery modes - intervention before withdrawal or non-completion
- Predict completion likelihood by program, campus, funding stream, and learner profile - enabling proactive support allocation and rostering decisions
- Forecast resource needs based on apprenticeship pipeline, full-time enrolment trends, and seasonal delivery patterns
- Benchmark performance against sector standards, comparable institutions, and your own historical trends - understand how you stack up on completion rates, time-to-credential, apprenticeship success, and learner satisfaction

STRATEGIC DECISION-MAKING

- Leadership dashboards showing ROI by program, campus, delivery mode (full-time, part-time, apprenticeship), and learner pathway
- Connect program design choices to learner outcomes - Identify what works and scale it. Understand how curriculum decisions, delivery modes, industry partnerships, and support interventions affect progression and completion
- Demonstrate impact to stakeholders: Completion rates, cost efficiency, apprenticeship employment outcomes, compliance performance, credit transfer success, learner satisfaction
- Evidence-based resource allocation and program development - data guides where to invest in new programs, industry partnerships, support services, and campus capabilities

Ready to unlock what you've already got?

Let's explore how Orqestra can unleash better outcomes across your institution - from operational efficiency to strategic growth.
